About

I am a web developer with three years experience who is passionate about web development and figuring out solutions to improve usability and functionality of websites and systems.

Work Experience

**All my work have showcase in website. Please check it out.*

Web Design

Website **2019 - present**

Used various of website builder to built many of websites like wordpress, canva, squarespace and wix etc.

Heng Out Cafe

eCommerce **2023**

Used NextJS built frontend and grab data to backend by using shopify storefront to able list product, cart, customer, invoice, etc

Sharely

Application **2021**

Its like a social media platform to let users able to post anythings like avatar, write something, comment and like post. Built by laravel framework.

Nutritionx

Application **2020**

Designed by using React library to able used to help people they need to know about knowlgedge of food thats make life more healthy

Projects

- **Mental Arithmetic Center (2020)**

Prototype a mental abacus application that can do some exercises and a function called Surprising Mental Arithmetic is like a list of number flash in order to calculate amount.

- **Vera (2019)**

Develop e-catalog on mobile to able marketing their product.

- **Aqua (2017)**

The project is like use motion capture on hand. A school of fish will follow the hand when you move around. The project are used a game engine called Unity to achieve it.

- **Pac-man (2017)**

Created like pac-man game inside have a messy maze and a player need to avoid ghost enemy.
